nice game men but only 1 level ? -.- release more i wanna PLAY !! come on !. "I Saw IT" is more than a game, it transcends what normal humans would call a "Masterpiece". It's pure beauty and geniality are hard to grasp for those who lacks the sentiment capacity to realize that we are getting closer and closer to the core of what we ignorantly call our universe, and that (it) is whom will bring us to the explosive conclusion of everything we've ever known.

It's philosophic genius start right at the loading screen, which is more than the game getting itself ready so we can't be consumed by madness after witnessing it's full potential, it's something more. Subtlety, we're giving tips on "controls" for the game. At first glance, it's just normal controls, but upon closer inspection you realize that it's deceiving (the player) into believing in alternate universes. For instance, (it) says that you can press E to open doors, even though there aren't doors in the game. You can crouch and jump, but there's no obstacles. You can reload, but there's no bullets. And the most mindblowing of all, F doesn't turn on your Flashlight, it "Turns on the light".

Scared yet? What could they mean by turning on the lights? Could it mean that we're just pawns on a bigger plan, nothing more than puppets on a show? It marvelously leaves subtle hints to interpretation and i'm shaking by the mere thought of having to turn on the lights at home. Would i dare to press F? I'm speechless. This is true Genius.

Our first objective is to find a fireplace and equip a weapon. Notice how the flames are green and burns in thin air, we'll get to it later. When you equip the Assis Axe of Alderan you soon realize that ((the_player)) holds it between his eyes, which covers a good amount of the screen. For me it was hard to see because of this, but it's again a subtle criticism about the vanity of men. Even in a forest far away from society, the player holds this material object like it's himself, and slowly becomes the weapon. Man. Becomes. War. It gives shivers down my spine.

Our second objective is to find 5 keys. It would be quite a ordinary task, but we soon realize that these keys are hidden inside monsters. Yes, fellow humans, monsters are real and for achieving true enlightenment we have to destroy them mercilessly. So we do it. There are dozens of corpses around the forest, which we soon realize that aren't the monsters victims, but ours. MBW (Man Becomes War).

I got tired of writing this♥♥♥♥♥the game is awful bye.. Walked around bix box forest with all trees looking the same, picked up one weapon, smacked 5 boys dead, won the game, all within 7 minutes. What could be better?

p.s. If you're as pro as I am then you can beat the game within two hours and return it to steam and get your money back... nyeh nyeh nyeh. the game stinks. one level - that's IT!. is var goad gaem!!. This game has given me so many great memories to share with my kids. It is undoubtedly the best game I have ever played. In fact, I think it is a better game than the original Silent Hill. See you at the game awards!!!!
